Dela - Featured Forms Collection

Hello, thank you for purchase!

Short Description

This is featured forms collection in modern flat design. Ready for a green estimate on Google Page Speed and Google Lighthouse. Preprocessor built template with good file structure, comments, and intuitive naming. Has autofill settings and field validation. All elements are vectorized and separate .svg files are included. Fonts are free from Google Fonts library or Font Awesome kit. Adobe XD template also included.

Contents

Installation

To install form you need to copy its HTML from .html or .pug file, and its styles from .css or .sass file of the demo page. No JavaScript required to transfer, forms using HTML5 standard with small inline code modifications.

To get forms`s code, look at position of the form, find HTML code in 'index.html' file, it will be form tag with class like this:

```
<form class="dela-preset-1-1" action="?" method="get">
…
</form>
```

To get it`s styles, look at class of the table, find CSS or SASS code in style template file - it will same class name like this:

```
// Preset 1 Begin
.dela-preset-#{$i}-1

    …
// Preset 1 End
```

You can use Pug code instead of HTML. Code in 'index.pug' file, it will look like this:

```
.preset-container
    form(class="dela-preset-"+i+"-1" action="?" method="get")
        …
```

Scaling

Presets using em CSS sizes. By changing initial value of font size in for tag container you are able to change it is scale proportionally. String with 1em setup will look like this:

```
// Preset 1 Begin
.dela-preset-#{$i}-1
     font-size: 16px
     …
```
